Senior Software Engineer with 8+ years building web applications, including trading interfaces built with Angular and internal developer platforms built on Backstage. I design reusable components and automate provisioning, configuration, and access management.

SKILLS

- Frontend: Angular, React, TypeScript, JavaScript, NgRx, RxJS
- Backend and APIs: Node.js, Python, PostgreSQL, REST APIs
- Developer Platforms: Backstage.io, Software Templates, Service Catalogs, Golden Paths
- Cloud and CI/CD: Docker, Kubernetes, Helm, Argo CD, Terraform, GitLab CI/CD

WORK EXPERIENCE

XM.com

Senior Software Engineer Mar 2024 - Present

- Design Backstage templates with shared provisioning, configuration, and access automation, reducing duplication and saving ~3,000 engineering hours monthly.
- Lead development of golden paths, scorecards, and service catalog workflows for a Backstage internal developer platform (IDP) in an organization of 1,000+ developers.
- Build Backstage plugins that use the Azure AI SDK to validate service catalog metadata.
- Mentor new team members on the codebase and development tools.

Technologies: Backstage.io, TypeScript, React, Node.js, Python, PostgreSQL, Azure AI SDK, Amazon EKS (AWS), Helm, Terraform, Argo CD, GitLab CI/CD

Senior Angular Developer Oct 2023 - Mar 2024

- Contributed to the Angular architecture and built reusable UI components for Trading.com's launch in Europe and Australia.
- Defined Angular component APIs that kept trading rules in each application, allowing teams to reuse components across products.

Technologies: Angular, TypeScript, NgRx, Signals, RxJS, JavaScript, Internationalization (i18n)

Morgan Stanley

Angular Developer Sep 2021 - Sep 2023

- Helped migrate 15+ wealth management applications from desktop to web, keeping existing backend APIs to support an incremental rollout.
- Implemented responsive data grids and real-time UI updates with Angular and AG Grid.

Technologies: Angular, AG Grid, RxJS, Jenkins, Jest, Karma, Jasmine, BitBucket

ExxonMobil

Full-Stack Developer May 2018 - Aug 2021

- Helped move email generation and styling to an internal web platform, reducing annual third-party tooling costs by ~$100K.
- Built a gamified employee engagement dashboard with Vue.js and Node.js.

Technologies: Vue.js, Node.js, Vuex, MongoDB, Amazon S3, SharePoint APIs

PERSONAL PROJECTS

Template Pulse

Built a Backstage plugin with React and Node.js to track software template adoption, success rates, and execution times, with searchable run history and permission-based access.
GitHub: alibayramli/template-pulse
