Ali Bayramli, Senior Full-Stack Engineer

Azerbaijan (UTC+4) | Available for in-office and remote B2B roles

Email: bayramliialii@gmail.com Portfolio: alibayramli.github.io/me LinkedIn: linkedin.com/in/alibayramli
Phone: +994773183356 GitHub: github.com/alibayramli

Senior Full-Stack Engineer with 8+ years building and modernizing enterprise web applications, trading platforms and internal developer tooling. Experienced in leading technical initiatives, designing reusable architectures and automating service setup.

SKILLS

- Frontend: Angular, React.js, TypeScript, JavaScript, NgRx, RxJS
- Backend and APIs: Node.js, REST APIs, PostgreSQL, Python
- Engineering Tooling: GitLab CI/CD, Backstage, Internal Developer Portals (IDP)

WORK EXPERIENCE

XM.com | Remote

Senior Software Engineer Mar 2024 - Present

- Build Backstage plugins with React, TypeScript and Node.js, including AI-assisted validation of service catalog metadata.
- Design reusable software templates that automate provisioning, configuration and access management, supporting automation estimated to save ~3,000 engineering hours per month.
- Lead development of service catalog features and scorecards for an internal developer portal in an organization of 1,000+ developers.
- Mentor new team members on the codebase and development tools.

Technologies: TypeScript, React.js, Node.js, PostgreSQL, Backstage.io, Python, GitLab CI/CD

Senior Angular Developer Oct 2023 - Mar 2024

- Designed reusable Angular components for Trading.com's expansion into European and Australian markets, separating market-specific trading rules from shared UI logic.

Technologies: Angular, TypeScript, NgRx, Angular Signals, RxJS, Internationalization (i18n)

Morgan Stanley | Budapest, Hungary (Hybrid)

Angular Developer Sep 2021 - Sep 2023

- Contributed to modernizing 15+ wealth-management applications by rebuilding complex desktop functionality as Angular web interfaces.
- Built reusable Angular solutions for wealth-management interfaces handling large amounts of financial data, including advanced AG Grid configurations and real-time updates with RxJS.

Technologies: Angular, AG Grid, RxJS, Jest

ExxonMobil | Budapest, Hungary (On-site)

Full-Stack Developer May 2018 - Aug 2021

- Helped move email generation and styling to an internal web platform, reducing annual third-party tooling costs by ~$100K.
- Built a gamified employee engagement dashboard with Vue.js and Node.js.

Technologies: Vue.js, Node.js, Vuex, MongoDB, Amazon S3, SharePoint APIs

PERSONAL PROJECTS

Template Pulse

Built a full-stack Backstage plugin with React, TypeScript and Node.js to track software template usage and run history, with searchable results and permission-based access. Designed it as an installable plugin that can be integrated into existing Backstage developer portals.
